

AUGUST NEWS & UPDATES

TELEHEALTH / TELEMEDICINE

The Medical Coding Unit is in the process of creating a crosswalk for all our Telehealth/Telemedicine codes with GT/GQ modifiers and the Place of service we show in our system for these specific codes.

This is still being created, and we will have a separate area for this crosswalk on our Medical Coding Resources page.

UPCOMING RESOURCES

The Medical Coding Unit along with our Policy Group and FFS are working hard to update policies, exhibits and attachments. As these policy changes happen items related to Medical Coding and FFS will be removed from the policy itself and placed either in the FFS Provider Billing Manual or here on our Medical Coding page. Some of the items you will be able to view soon will be the Telehealth/Telemedicine updates, the Behavioral Health coding policies from the Covered Behavioral Health Service Guide and attachments. We are working hard to have all these out for your resources as soon as possible.

Q5 & Q6 MODIFIER UPDATE

The Medical Coding Unit is actively working on adding these modifiers back to the system. We have updated all the 6xxx, 7xxx, and 8xxx code sets. If you find any Q5 Q6 modifiers causing you denials, please send a Reference Table Update request, this form can be found on this webpage.
