Major Decisions
Major Decisions
July 2022

- Eligibility Determinations for individuals who may have a Serious Emotional Disturbance (SED) or a Serious Mental Illness (SMI):
  - The awarded contractor under RFP YH23-0001 will be responsible for rendering the final eligibility determinations for individuals who may have an SMI designation as well as for children who may have an SED designation. The individual’s provider is responsible for completing an SED or SMI assessment and submitting documentation to the awarded contractor.
Major Decisions
July 2022

- System Behavioral Health Category for individuals determined to have an SED or SMI designation:
  - Effective October 1, 2023, AHCCCS will implement a new system indicator, referred to as a behavioral health category, for identification of individuals who are determined to have an SED. Currently, individuals with an SED designation can be identified in the Pre-Paid Medicaid Management Information System (PMMIS) and SED status is only available to those entities with PMMIS access. This change will allow providers to view the individual’s behavioral health category on the member’s behavioral health record in the AHCCCS Online system to further improve coordination efforts.
Major Decisions
July 2022

- Tribal ALTCS and TRBHA use of contractor for SED and SMI Eligibility Determinations:
  - Tribal ALTCS and TRBHAAs may utilize the contractor to render SED and/or SMI Eligibility Determinations on their behalf or may coordinate for the provision of the SED and/or SMI Eligibility Determination themselves.

Arizona’s Olmstead Plan

Adam Robson, AHCCCS Employment Administrator
The story of the Olmstead case began with two women, Lois Curtis and Elaine Wilson:

- Both had diagnoses of mental health conditions and intellectual disabilities.
- Both voluntarily admitted to the psychiatric unit in the State-run Georgia Regional Hospital.
- Following the women's medical treatment there, mental health professionals stated that each was ready to move to a community-based program.
- Both remained confined in the institution, each for several years after the initial treatment was concluded.
- Both filed suit under the Americans with Disabilities Act (ADA) for release from the hospital.

- States are required to provide community-based services for individuals with disabilities who would otherwise be entitled to institutional services:
  - State’s treatment professionals reasonably determine that such placement is appropriate,
  - The affected person is in agreement with the decision, and
  - The placement can be reasonably recommended, taking into account the resources available to the State and the needs of others who are receiving State-supported disabilities services.
Arizona’s Approach

• The Court did not require states to develop a plan, but Arizona chose to do so.
• Providing services and treatment in the most integrated settings is an underlying principle the service system.
• The population targeted to benefit from the Olmstead Plan are all individuals who may be at risk of institutionalization, including individuals with behavioral health needs and members of the ALTCS program, including Tribal ALTCS programs.
• Arizona’s compliance with the Olmstead Decision has historically been incorporated into rules, policies, and practices.
Arizona’s Approach (continued)

• Intent of the Olmstead Plan is for it to be both an actionable and a “living” plan with specific goals, objectives, metrics, and evaluation methods.
  o Any recommendations to make changes to the Olmstead Plan after the Plan is posted as final will be placed in a parking lot for consideration during the next round of changes.

• AHCCCS plans to post updates to the plan as well as available data on outcomes ensuring the protection of member health information.

• Annually, AHCCCS plans to convene stakeholder forums, along with a public comment period, to reassess needs by soliciting input and feedback on the progress of the current plan, while considering suggestions for new areas of focus.
Arizona’s Practice of Advancing Olmstead

- AHCCCS has adopted a culture of engagement and transparency.
- The original 2001 Olmstead Plan was guided by planning principles set forth by CMS to develop a plan with the following intentions:

<table>
<thead>
<tr>
<th>Intention</th>
<th>2022 Arizona Olmstead Plan</th>
</tr>
</thead>
<tbody>
<tr>
<td>Striving for outcomes of serving members in the most integrated setting appropriate</td>
<td>✓</td>
</tr>
<tr>
<td>Involving members in the planning process</td>
<td>✓</td>
</tr>
<tr>
<td>Assessing for opportunities to mitigate institutionalization</td>
<td>✓</td>
</tr>
<tr>
<td>Ensuring the availability of community-integrated services</td>
<td>✓</td>
</tr>
<tr>
<td>Offering members &amp; their families the opportunity to make informed decisions and choices regarding how their needs can best be met</td>
<td>✓</td>
</tr>
<tr>
<td>Evaluating implementation informed by quality assurance and improvement processes</td>
<td>✓</td>
</tr>
</tbody>
</table>
Arizona’s Practice of Advancing Olmstead

The Preamble also provides a list of accomplishments from the most recent 2003 Olmstead Plan, as well as what those accomplishments look like in present day practices/initiatives.

Here are a couple examples:

Arizona’s 2022 Olmstead Plan In Development

• Developed an AHCCCS Olmstead web page.
• Created an Olmstead Survey (summary on web page).
• Convened a workgroup, including members/family members across the state.
• Hosted two Olmstead Community Forums in late-2021.
• The Plan is limited in scope to initiatives for which AHCCCS can have a direct impact on the systemic change and is not exhaustive of all AHCCCS’ efforts to comply with the spirit of the Olmstead decision.
• Targeted strategies are directed at the mitigation of institutionalization and supporting the successful transition of members from institutional settings into community-based living and service delivery.
Evaluation and Transparency

• Design of the Olmstead Plan is for it to be actionable and “living”, meaning it will change over time.
• Contains specific timelines for objectives, including, as applicable, specific performance targets to measure positive change.
• AHCCCS plans to post updates to the plan, including available data on outcomes, while ensuring the protection of member health information.
• Annually, AHCCCS will hold a public comment period and convene stakeholder forums to reassess needs, while considering suggestions for new areas of focus.

A need is identified (by system change or stakeholders) to start a new policy and/or revise an existing policy. New policies will go to Tribal Consultation before starting the process.

All existing stakeholder input (including from tribal partners and previous tribal consultations) is reviewed to consider in the new policy or existing policy.

The workload is identified for AHCCCS staff for proposing policy and/or revisions.

Following assignments given at the kick-off, the staff does the work.

If needed, AHCCCS assesses the cost and/or legal ramifications.

Leaders give feedback to staff about any needed changes before the Assistant Director approves to go to stakeholder review.

Stakeholder input is included in the reasons for changes. Stakeholders that sit on APC, including 6 tribal members, comment on adjustments that may be needed.

AHCCCS authors present changes and reasons for changes.

AHCCCS takes back all APC feedback and makes adjustments agreed upon from AHCCCS staff and stakeholders.

AHCCCS posts all updated policies open for Tribal Consultation via written testimony every Friday.

Tribes express policy positions and reactions to proposed policy changes either during Tribal Consultation meeting OR via written testimony (using the AHCCCS Policy Public Comment portal).

Follow policies and provide any feedback on-going for a future parking lot for the next round of revisions.

AHCCCS Crisis in Arizona

RBHAs
Effective October 1, 2022
988 and 911

- 988 and 911 are designed to be complementary.
- 911 is currently used for all emergencies, including behavioral health emergencies. However, 911 dispatchers may not be trained on how to de-escalate crisis calls.
- 988 is a behavioral health crisis number, 988 counselors are trained to assist people in emotional distress, suicidal crisis, or struggles with substance use.
- 988 counselors can de-escalate a crisis over the phone and connect callers with community resources for ongoing support.
- Ongoing collaboration between 988 and 911 will help individuals in crisis get the appropriate support, potentially providing options like mobile crisis teams in place of police or emergency medical services (EMS) responders when needed and where available.
The Federal Government is not providing block funding to advertise the new 988 number at this time. ADHS will seek to fill this gap by using existing suicide prevention funding to mount a statewide, multi-modal advertising campaign.

The 988 national crisis line rollout will be the most significant initiative for the ADHS 2022-2023 Arizona Suicide Prevention Action Plan.

Planning priorities:

• Increasing awareness of the new, dial-anywhere number will allow an Arizonan in crisis to connect to help no matter where they are.

• Creating messaging and coordinating for an exhaustive awareness campaign.
Arizona 988 Marketing ADHS/AHCCCS

ADHS will partner with AHCCCS in order to fund a campaign advertising the 988 crisis number in Arizona. Goals/Timeline:

- By 15 June 2022, finalize draft version of the 2022-2023 Arizona Suicide Prevention Action Plan in order to support AHCCCS 988 grant award (complete).
- By 30 September, 2022, select marketing firm to develop desired marketing materials.
- By 31 December 2022, update all promotional materials from the current 1-800-273-8255 number to 988.
- By 30 June 2023, initiate minimal marketing strategies during capacity building phase and evaluate implemented strategies to determine reach, clarity, and effectiveness.
- (continuous) Serve on the 988 Advisory Committee to guide 988 planning and implementation efforts.
