

Outpatient Pharmacy – Billing with NDCs

As discussed in various meetings and forums throughout 2015, AHCCCS is moving forward to require that, effective 7/1/2016, any reimbursement for pharmacy counseling services must also include NDC information on the claim to receive the All Inclusive Rate.

Improving health outcomes and reducing negative drug interactions depends upon our ability to collect this data from IHS and 638 facilities.

Data sharing will allow for better care coordination, better medication management and improved program integrity.

The Resource and Patient Management System (RPMS) does support electronic submission of NCD data via X12-837 file format.

Testing with AHCCCS can begin at any time.
