

NDC Issues/Questions

Issues:

All pharmacy claim lines billed with rev code 0519 must have a valid NDC code on every line.

Claim lines billed with rev code 0519 are missing the NDC codes on lines 3 & 4, etc. This will cause the whole claim to deny even if the first line contains a valid/covered NDC.

The only exception is when billing for anticoagulants with the corresponding diagnosis code.

Invalid NDC codes: If the NDC code on each line does not follow the standard NDC format (i.e. typo) the whole claim will deny even if the first line contains is a valid/covered NDC code.

Thank You.
