

**Attachment 2:**  
**Arizona's Child and Adolescent Service Intensity Instrument<sup>1</sup>**  
**Children/Adolescents Age 6 through 17**  
**Scoring Sheet**

(Please also refer to the [ADHS/DBHS Demographic Data Set User's Guide](#))

Child/ Adolescent: \_\_\_\_\_ CIS #: \_\_\_\_\_

Behavioral Health Staff Person: \_\_\_\_\_ Date (CIS Field # ): \_\_\_\_\_

Dimension	Rating					
	1	2	3	4	5	
I. Risk of Harm	1	2	3	4	5	
II. Functional Status	1	2	3	4*	5	
III. Co-Occurring	1	2	3	4*	5	
IV. Recovery Environment						
A. Environmental Stress	1	2	3	4	5	
B. Environmental Support	1	2	3	4	5	
V. Resiliency & Response to Services	1	2	3	4	5	
VI. Involvement in Services						
A. Child/Adolescent	1	2	3	4	5	
B. Parent and/or Caretaker	1	2	3	4	5	N/A

**Scoring Notes:**

**Bold** indicates independent criteria which requires automatic high level of service intensity regardless of combined composite score. A score of 4 results in level 5 service intensity and a score of 5 results in level 6 service intensity.

\* = Independent criteria may be waived if the sum of IVA and IVB scores equals 2.

When calculating the composite score, calculate only the higher score from VIA and VIB.

<b>Composite Score</b>	
<b>Level of Service Intensity (CIS Field # _____)</b>	

Rationale for selected level of intensity:

---

---

---

---

Target Date for Next Update: \_\_\_\_\_

**Service Expectation: The CASII is not to be used to determine eligibility for specific levels of care, types of services, or particular service models.**
