Provider Type: Justice
Area of Concentration: Adults Transitioning from Criminal Justice System

Project: Ambulatory

Area of Concentration: Adults Transitioning from the Criminal Justice System

Provider Type: Integrated Clinics

Objective: To integrate primary care and behavioral health services for the purposes of better coordination of the preventive and chronic illness care for adults with behavioral health needs transitioning from the Criminal Justice System.

1.	**Participate in the Targeted Investments Program Quality Improvement Collaborative (QIC) offered by the Arizona State University College of Health Solutions. The QIC will support TI Program participants by providing interim updates on their Year 4 Milestone Performance Measures, assist with quality improvement, offer HEDIS ™ technical assistance, and facilitate peer learning.**
	Milestone #1 (October 1, 2019–September 30, 2020) **x10**
	By September 30, 2020, attest that: A. The participating organization has registered both an administrative representative and licensed clinical representative to participate in the TI Program Quality Improvement Collaborative (QIC). Organizations with only one site participating in the TI Program may elect to have one representative if that person has both clinical and administrative Program responsibilities. B. The organization's administrative and clinical QIC representatives (excepting one site participants as noted above) or their designees have attended the January 27, 2020 in-person kick-off meeting **and** 80% of the Year 4 Quality Improvement Collaborative virtual group meetings offered for the Area of Concentration.

2.	**Identify where along the Levels of Integrated Healthcare continuum the practice falls (see table below). To do so, please complete the Integrated Practice Assessment Tool (IPAT).**

COORDINATED KEY ELEMENT: COMMUNICATION		CO-LOCATED KEY ELEMENT: PHYSICAL PROXIMITY		INTEGRATED KEY ELEMENT: PRACTICE CHANGE	
LEVEL 1 Minimal Collaboration	LEVEL 2 Basic Collaboration at a Distance	LEVEL 3 Basic Collaboration Onsite	LEVEL 4 Close Collaboration Onsite with Some Systems Integration	LEVEL 5 Close Collaboration Approaching an Integrated Practice	LEVEL 6 Full Collaboration in a Transformed /Merged Integrated Practice

	Milestone #2 (October 1, 2019–September 30, 2020) **x10**
	Complete an updated IPAT score between August 1, 2020 and Sept 30, 2020 and report the practice site's level of integration using the results of the IPAT level of integration tool to AHCCCS (participants will be inputting the score in the Attestation Portal).

Provider Type: Justice
Area of Concentration: Adults Transitioning from Criminal Justice System

Performance Measure Targets: Established per organization based on baseline performance

Performance Measure	Measure Description	Measure Sets
Engagement of Alcohol and Other Drug Abuse or Dependence Treatment (34 - Day)	Percentage of beneficiaries age 18 and older with a new episode of alcohol or other drug (AOD) abuse or dependence who received continued engagement of AOD Treatment. Percentage of beneficiaries who initiated treatment and who had two or more additional AOD services or medication treatment within 34 days of the initiation visit.	
Initiation of Alcohol and Other Drug Abuse or Dependence Treatment (14 - Day)	Percentage of beneficiaries age 18 and older with a new episode of alcohol or other drug (AOD) abuse or dependence who received initiation of AOD Treatment. Percentage of beneficiaries who initiated treatment through an inpatient AOD admission, outpatient visit, intensive outpatient encounter or partial hospitalization, telehealth, or medication treatment within 14 days of the diagnosis.	
Follow up after hospitalization for mental illness: 18 and older (30 - Day)	Percentage of discharges for beneficiaries age 18 and older who were hospitalized for treatment of selected mental illness diagnoses or intentional self-harm and who had a follow-up visit with a mental health practitioner within 30 days after discharge.	
Follow up after hospitalization for mental illness: 18 and older (7 - Day)	Percentage of discharges for beneficiaries age 18 and older who were hospitalized for treatment of selected mental illness diagnoses or intentional self-harm and who had a follow-up visit with a mental health practitioner within 7 days after discharge.	
Diabetes Screening for people with Schizophrenia or Bipolar Disorder who are using antipsychotic medications	Percentage of beneficiaries ages 18 to 64 with schizophrenia, schizoaffective disorder, or bipolar disorder who were dispensed an antipsychotic medication and had a diabetes screening test during the measurement year.
