AHCCCS Targeted Investments Program
Core Components and Milestones

Project: Ambulatory

Area of Concentration: Adults Transitioning from the Criminal Justice System

Provider Type: Regional Behavioral Health Authority (RBHA) Selected Providers

Objective: To integrate primary care and behavioral health services for the purposes of better coordination of the preventive and chronic illness care for adults with behavioral health needs transitioning from the Criminal Justice System.

Unless otherwise stated, demonstration that the practice has met the criteria listed in each Milestone Measurement is due by September 30th of the respective Milestone Measurement Period. *

Note: Selected providers are also required to participate in the Adults with Behavioral Health Needs – Area of Concentration- Primary Care Provider area of concentration.

1.	**Utilize a behavioral health integration toolkit, to develop a practice-specific course of action to improve integration, building from the self-assessment results that were included in the practice's Targeted Investments application.** **Behavioral health integration toolkit examples can be found through the Substance Abuse and Mental Health Services Administration, Health Resources and Services Administration (SAMHSA-HRSA) Center for Integrated Health Solutions (see www.integration.samhsa.gov/operations-administration/assessment-tools).**	
	Milestone Measurement Period 1 (October 1, 2017–September 30, 2018**) **Practice Reporting Requirement to State**	**Milestone Measurement Period 2** (October 1, 2018–September 30, 2019**) **Practice Reporting Requirement to State**
	By December 31, 2017, identify the name of the integration toolkit the practice has adopted and document a practice-specific action plan informed by the practice's self-assessment, with measurable goals and timelines.	By October 31, 2018, demonstrate substantive progress has been made on the practice-specific action plan and identify barriers to, and strategies for, achieving additional progress. By July 31, 2019, report on the progress that has been made since November 1, 2018 and identify barriers to, and strategies for, achieving additional progress.

<table>
<tr><td rowspan="4">2.</td><td colspan="2"><u>For all practices delivering primary care</u>[1]<u>:</u>
Identify members who are at high-risk and develop an electronic registry to track those members and support effective integrated care management. Practices should consider multiple sources when identifying members at high risk, including information provided by managed care organizations (MCOs), electronic health record (EHR)-based analysis of members with distinguishing characteristics, clinical team referral and Admission-Discharge-Transfer (ADT) alerts received from Health Current (Arizona Health-e Connection). Practices should prioritize members within the registry whose status may be improved or favorably affected through practice-level care management.

The registry may be maintained inside or outside of the EHR.</td></tr>
<tr><td>Adult members at high risk are determined by the practice, but must include members with or at risk for a behavioral health condition who are at high risk of a) near-term acute and behavioral health service utilization and b) decline in physical and/or behavioral health status.</td><td>Pediatric members at high risk are determined by the practice, but must include children/youth who a) have or are at increased risk for chronic physical, developmental, behavioral or emotional conditions and b) also require health and related services of a type or amount beyond that required by children/youth generally. This registry must also include all children/youth who have or are at risk for autism spectrum disorder (ASD) and all children/youth engaged in the child welfare system.</td></tr>
<tr><td>Milestone Measurement Period 1
(October 1, 2017–September 30, 2018**)
Practice Reporting Requirement to State</td><td>Milestone Measurement Period 2
(October 1, 2018–September 30, 2019**)
Practice Reporting Requirement to State</td></tr>
<tr><td>A. By April 2018, demonstrate that a high-risk registry has been established and articulate the criteria used to identify high-risk member members.
B. By September 2018, demonstrate that the high-risk identification criteria are routinely used and that the names and associated clinical information for members meeting the practice criteria are recorded in the registry.</td><td>By September 2019, demonstrate that the care manager is utilizing the practice registry to track integrated care management activity and member progress, consistent with Core Component 3A and/or 3B.</td></tr>
</table>

[1] Practices delivering primary care means the practice assumes full responsibility for meeting all the primary care needs of a group of patients seen at the practice.

Provider Type: Regional Behavioral Health Authority (RBHA) Selected Providers

<table>
<tr><td>3.</td><td colspan="2"><u>For adult practices delivering primary care</u>:[2]

Utilize practice care managers[3] for members included in the high-risk registry, with a case load not to exceed a ratio of 1:100. Care managers may be employed directly by the practice, an affiliated entity (for example, Accountable Care Organization, integrated health system) or contracted by the practice from external sources. Practice-level care management functions should include:

1) Assessing and periodically reassessing member needs.
2) Playing an active role in developing and implementing integrated care plans.
3) Collaboratively supporting hospital transitions of care (especially following hospitalization for mental illness).
4) Coordinating members' medical and behavioral health services, assuring optimal communication and collaboration with MCO and/or other practice case or care management staff so that duplication in efforts does not occur and that member needs are addressed as efficiently as possible.
5) Working with members and their families to facilitate linkages to community organizations, including social service agencies.</td></tr>
<tr><td></td><td>Milestone Measurement Period 1
(October 1, 2017–September 30, 2018**)
Practice Reporting Requirement to State</td><td>Milestone Measurement Period 2
(October 1, 2018–September 30, 2019**)
Practice Reporting Requirement to State</td></tr>
<tr><td></td><td>A. By June 30, 2018, identify at least one care manager assigned to provide integrated care management services for members listed in the practice high-risk registry. Indicate the caseload per care manager full time equivalent (FTE).
B. Document that the duties of the practice care manager include the elements of care management listed in this Core Component, and document the process for prioritizing members to receive practice care management consistent with Core Component 2.
C. By September 30, 2018, demonstrate that the care manager(s) has</td><td>A. By March 31, 2019, document that care managers have been trained in motivational interviewing, including member activation and self-management support.
B. Based on a practice record review of a random sample of 20 members listed in the high-risk registry during the past 12 months, attest that the care manager has documented: a) completing a comprehensive assessment, b) educating members, c) conducting motivational interviewing, d) appropriately facilitating linkages to community-based organizations, and e) whether the member already received integrated</td></tr>
</table>

[2] Practices delivering primary care means the practice assumes full responsibility for meeting all the primary care needs of a group of patients seen at the practice.
[3] Care managers are responsible for high-risk patients at one or more defined practices where they work on an ongoing basis as a member of the care team and have relationships with practices and practice teams. Care managers can be located within the practice site, nearby or remotely and available through telephone or in person through telepresence means. A care manager must be a registered nurse with a Bachelor's degree or a Master's prepared licensed social worker. In the event the practice is unable to hire a care manager(s) with those qualifications, a licensed practical nurse or a Bachelor's prepared licensed social worker is acceptable.

	been trained in: • Comprehensive assessment of member needs and goals; • Use of integrated care plans; • Member and family education; and • Facilitating linkages to community-based organizations, utilizing resources identified in Core Component 10.	care/case management from other practices and/or MCOs, at least 85% of the time.

4.	**Implement the use of an integrated care plan[4], using established data elements[5], for members identified as part of Core Component 2.**	
	Milestone Measurement Period 1 (October 1, 2017–September 30, 2018**) **Practice Reporting Requirement to State**	**Milestone Measurement Period 2** (October 1, 2018–September 30, 2019**) **Practice Reporting Requirement to State**
	By September 30, 2018, demonstrate that the practice has begun using an integrated care plan.	Based on a practice record review of a random sample of 20 members, whom the practice has identified as having received mental health services during the past 12 months, attest that the integrated care plan, which includes established data elements, is documented in the electronic medical record 85% of the time.

[4] An integrated care plan is one that prioritizes both physical and behavioral health needs, and reflects the patient and provider's shared goals for improved health. It includes actionable items and linkages to other services and should be updated continually in consultation with all members of the clinical team, the patient, the family and when appropriate, the Child and Family Team.
[5] Established data elements may include: problem identification, risk drivers, barriers to care, medical history, medication history, etc. AHCCCS will lead a stakeholder process to identify a set of established data elements that should be included in an integrated care plan.
