

Behavioral Health-Targeted Investments Incentive Payment Determination Process

Behavioral Health Participants: By Site [SPN]*

¹ Service units	X	² Attested Milestones [weighted]	X	³ Milestone rate	=	Total TI Incentive Payment
----------------------------	---	---	---	-----------------------------	---	----------------------------

1. Number of qualified service units provided during the FFY 2017 (10/1/2016-9/30/2017) based on per site [identified by the AHCCCS provider ID#] encounters with its contracted AHCCCS MCOs.
2. Milestones attested to and validated, each weighted to a relative value based level resources needed.
3. Per Milestone/Per Service Unit per Year (PSUPY) is the per-service unit value determined by AHCCCS for each qualified service unit provided by the TI participating practice as determined by AHCCCS. For example, it is comparable to the \$0.79 or \$0.99 amount cited in the TI Program acceptance letter you received to calculate your TI Year 1 incentive payment.

Available program funding for TI Year 2 is 66.5 million.

*For both Primary Care and Behavioral Health: The incentive payment calculated for each site in a participating organization is totaled. The total is allocated to the organization's contracted AHCCCS MCOs proportionate to each plan's service utilization as a percent of the total service utilization paid by the organization's contracted MCOs. AHCCCS instructs each of the organization's contracted plans to make the specified payment to the organization.
