

Primary Care-Targeted Investments Incentive Payment Determination Process

For Primary Care Participants: By Site [SPN]*

¹ Members assigned to the practice	X	² Milestones Achieved [Weighted]	X	³ Milestone Rate	=	Total TI Incentive Payment
-----------------------------------------------	---	---------------------------------------------	---	-----------------------------	---	----------------------------

1. Number of AHCCCS members assigned to providers in the practice by AHCCCS contracted acute and RBHA MCOs as of May 1, 2018.
2. Milestones attested to and validated, each weighted to a relative value based level resources needed.
3. Per Milestone/Per Member Value per Year is the per member value determined by AHCCCS for each assigned member to the practice as reported to AHCCCS by its contracted MCOs. For example, it is comparable to the \$16.15 or \$20.19 amount cited in the TI Program acceptance letter you received to calculate your TI Year 1 incentive payment.

Available program funding for TI Year 2 is 66.5 million.

*For both Primary Care and Behavioral Health: The incentive payment calculated for each site in a participating organization is totaled. The total is allocated to the organization's contracted AHCCCS MCOs proportionate to each plan's service utilization as a percent of the total service utilization paid by the organization's contracted MCOs. AHCCCS instructs each of the organization's contracted plans to make the specified payment to the organization.
