

### Service Categorization for Data Book

The Service Categorization for Data Book Excel document defines the selection criteria used to group encounters into service categories using a hierarchy of medical service criteria. There are three levels of service categories. A single encounter can only be counted in one service category per level. The capitation rates will group encounters into categories based on some combination of the three service levels. The current ALTCS E/PD rate setting categories are provided in the Service Categorization for Rate Setting Excel document.

The columns in the Service Categorization for Data Book Excel file are defined as follows:

**Column A - Service Level 1 Category Number** - This is the number of the service category for level 1.

**Column B - Service Level 1 Category Description** - This is the description of the service categories for level 1.

**Column C - Service Level 2 Category Number** - This is the number of the service category for level 2.

**Column D - Service Level 2 Category Description** - This is the description of the service categories for level 2.

**Column E - Service Level 3 Category Number** - This is the number of the service category for level 3.

**Column G - Service Level 3 Category Description** - This is the description of the service categories for level 3.

**Column G - AHCCCS Form Type** - This is the selection criteria for Form Type for this service category. See Data Supplement Section D – AHCCCS Reference Tables for definitions of each AHCCCS Form Type.

**Column H - AHCCCS Provider Type** - This is the selection criteria for the servicing provider type for this service category. See Data Supplement Section D – AHCCCS Reference Tables for definitions of each AHCCCS Provider Type.

**Column I - AHCCCS Category of Service** - This is the selection criteria for the AHCCCS Categories of Service to be included for this service category. See Data Supplement Section D – AHCCCS Reference Tables for definitions of each AHCCCS Category of Service.

**Column J - Other Selection Criteria** - This column includes any other necessary selection criteria. The Offeror should pay close attention to this column in order to understand how the encounter information in the Service Detail document in Data Supplement Section E – Data Book Information was categorized.
