**5. An agency's justification and reason why a rule should be made, amended, repealed or renumbered, to include an explanation about the rulemaking:**

The proposed rulemaking will amend and clarify rules specifying payments to hospitals for inpatient services under the Diagnostic Related Group (DRG) methodology. Significantly, this rulemaking will also include the addition of differential adjusted payments made to hospitals for both inpatient and outpatient services which satisfy specific criteria for receipt of VBP Differential Adjusted Payments by the AHCCCS Administration as well as Managed Care Contractors. The purpose of VBP Differential Adjusted Payments is to reward hospital providers that have taken designated actions to improve patients' care experience, improve members' health, and reduce the growth of the cost of care. Facilities which satisfy the criteria will receive increased payments for inpatient and outpatient services. Other topics of the proposed rulemaking include addition of a high acuity pediatric policy adjustor and clarification of payments for hospitalization of members who no longer meet inpatient criteria when they cannot be safely discharged, when no other setting is available, or when members must be transferred to another hospital for sub-acute services.

**6. A reference to any study relevant to the rule that the agency reviewed and proposes either to rely on or not to rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:**

A study was not referenced or relied upon when revising these regulations.

**7. A showing of good cause why the rulemaking is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:**

Not applicable.

**8. The preliminary summary of the economic, small business, and consumer impact:**

The Administration anticipates a moderate economic impact on the implementing agency, small businesses and consumers for the rule changes:

- The Administration anticipates that the Value Based Purchasing (VBP) will result in approximately \$3.6 million of additional payments for the contract year October 1, 2016 through September 30, 2017 to about 19 qualifying hospitals that have taken designated actions to improve patients' care experience, improve members' health, and reduce the growth of the cost of care for inpatient and outpatient services.
- The Administration amended rule to clarify the description of how DRG payments are made, including transplant services. The amended rule also clarifies how DRG payments are made for Administrative days and transfers. These changes are not expected to have an economic impact on any party since the changes are only for clarification and do not change a service or payment. The revisions to the rules will enhance the public's understanding.
- In addition, the Administration added a high acuity pediatric policy adjustor for January 1, 2016 to recognize the higher cost of treating higher acuity pediatric patients. It is anticipated that the high acuity pediatric policy adjustor will result in annual additional payments of \$19.4 million to 53 hospitals.

- C. Each claim for an inpatient hospital stay shall be assigned a DRG code and a DRG relative weight based on version 31 of the All Patient Refined Diagnosis Related Group (APR-DRG) classification system established by 3M Health Information Systems. If version 31 of the APR-DRG classification system will no longer support assigning DRG codes and relative weights to claims, and 3M Health Information Systems issues a newer version of the APR-DRG classification system using updated DRG codes and/or updated relative weights, then ~~the more current version~~ an updated version established by 3M Health Information Systems will be used; however, if the ~~newer~~ version employs updated relative weights, those weights will be adjusted using a single adjustment factor applied to all relative weights to ensure that the statewide weighted average of the updated relative weights does not increase or decrease from the statewide weighted average of the relative weights used under version 31.
- D. Payments for inpatient hospital services reimbursed using the DRG payment methodology are subject to quick pay discounts and slow pay penalties under A.R.S. 36-2904.
- E. Payments for inpatient hospital services reimbursed using the DRG payment methodology are subject to the Urban Hospital Reimbursement Program under R9-22-718.

rates and outlier thresholds are included in the capped fee schedule published by the Administration on its website and available for inspection during normal business hours at 701 E. Jefferson, Phoenix, Arizona. If the covered costs per day on a claim exceed the published threshold for a day, the claim is considered an outlier. Outliers will be paid by multiplying the covered charges by the outlier CCR. The outlier CCR will be the sum of the urban or rural default operating CCR appropriate to the location of the hospital and the statewide capital cost-to-charge ratio in the data file established as part of the Medicare Inpatient Prospective Payment System by CMS. The resulting amount will be the total reimbursement for the claim. There is no provision for outlier payments for hospitals described under subsection (A)(3).
